

LATERAL FLEXICLEAN STANDARD

DO NOT HARM SENSITIVE SURFACE
CAN REDUCE CLEANING TIME UP TO 80%
LONG LIFETIME CLEANING HEADS

Description

The Envirent Lateral FlexiClean Standard Tool is a field proven and efficient product.

Typical Operations

- ▣ ROV Chain Cleaning
- ▣ Marine growth removal

Features

- ▣ Long lifetime cleaning heads
- ▣ Effective Tool for marine growth removal
- ▣ Can reduce cleaning time up to 80%
- ▣ Hydraulic motor interface directly to ROV
- ▣ Does not harm sensitive surface

SPECIFICATIONS

Lateral FlexiClean Standard

General Specification

Type	Lateral FlexiClean Standard
Part Number	CT-LAT-STD
Weight in Air / Water	15 / 12 Kg

Hydraulic Specifications

Max. Input Pressure	140 bar
Max. Input Flow l/min	35 l/min

Hydraulic Connections

Port A	JIC 06
Port B	JIC 06

Made for work class ROVs

Standard Head

- Original FlexiClean
- Long lifetime cleaning heads.
- Effective tool for marine growth removal.
(Can reduce cleaning time by up to 80%)
- Hydraulic motor interfaces directly to ROV

Low Vibration Head

- Reduce strain and wear on manipulator
- Long lifetime cleaning heads.
- Effective tool for marine growth removal.
(Can reduce cleaning time by up to 80%)
- Hydraulic motor interfaces directly to ROV

Heavy Duty Head

- Clean the toughest of marine growth.
- Long lifetime cleaning heads.
- Does not harm sensitive surfaces.
- Hydraulic motor interfaces directly to ROV
- Available in different finger configurations.
