

SCISSOR CUTTING TOOL

ROV INTERVENTION
SUBSEA CUTTER
181 MM OPENING

Description

Scissor Cutting Tool is designed to be used on a ROV by using a rugged fishtail handle and operated by hydraulic pressure. It is equipped with an integrated pressure intensifier.

Some of the areas of use:

- Rod materials
- Tubes
- Profiles
- Frames
- Cables
- Small steel wires up to Ø20*
- Decommissioning

*If wire is to be cut, please clarify with supplier

Typical Operations

- ▣ Cutting Operation

Features

- ▣ Integrated pressure intensifier
- ▣ Blade opening 181 mm
- ▣ Cutting force 65,7 T
- ▣ Blade type A30 holmatro
- ▣ Small footprint
- ▣ ROV friendly cutting tool
- ▣ Multipurpose use

SPECIFICATIONS

SCISSOR CUTTING TOOL

General Technical Specifications

Type	Scissor Cutting Tool
Part Number	103309
Dimensions L x W x H	775 mm x 270 mm x 218 mm
Weight in air / submerged	~20 kg / ~15 kg

Hydraulic

Max Input Pressure	207 Bar
Max Input Flow	5 L/min

Connection ROV Pressure	JIC #4
Connection ROV Return	JIC #4

Technical

Depth Rating	MSW 3000
