COMPENSATOR 100 LITERS SPRING LOADED

A PART OF ENVIREX COMPENSATOR SERIES

Description

The Envirex Compensator Series represents a number of hydraulic compensators that features a reliable and solid design, made to handle harsh subsea environments on great depths.

The compensator is designed for systems which requires relatively over-pressure on depths down to 5000 meter and are typically used as fluid reservoirs for subsea systems.

The compensators are produced of stainless steel, GRP and POMC materials with stainless steel springs.

In addition to our hydraulic compensators, we also deliver complete subsea control systems (hydraulic, electronic and software).

Features

- Solid and Reliable Design
- Facilitates system over-pressure
- Analog fluid level sensor

Typical Applications

- Subsea HPU Systems
- Subsea Reservoir
- Chemical Injection
- Subsea RWOCS System
- Subsea Excavators
- Trenchers

Specifications

100L Compensator

General Technical Specifications
