

3x ROV Valve Panel

207, 345, 520 or 690 Bar configs.
207 Bar Ball Valve as Standard

Description

The 3x ROV Valve Panel is a compact and versatile fluid control panel designed for integration in an ROV belly basket. The three valves can be configured to split one supply line into three, combine three lines into one, or operate as three individual valve circuits.

The modular configuration allows the panel to be adapted to different operational requirements and connection setups. Standard pressure rating is 207 bar unless otherwise specified.

Typical Operations

- ▣ Fluid distribution and isolation
- ▣ Combining or splitting fluid lines
- ▣ Control of individual fluid circuits

Features

- ▣ Three individually operated valves
- ▣ Flexible 1-to-3, 3-to-1 configuration or independent valve operation.
- ▣ Designed for ROV belly basket integration

SPECIFICATIONS

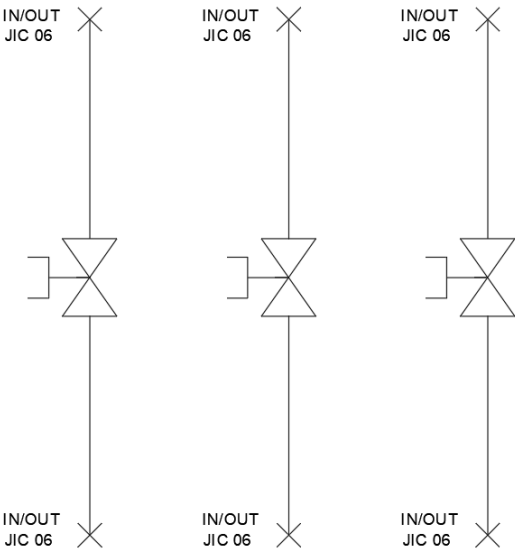

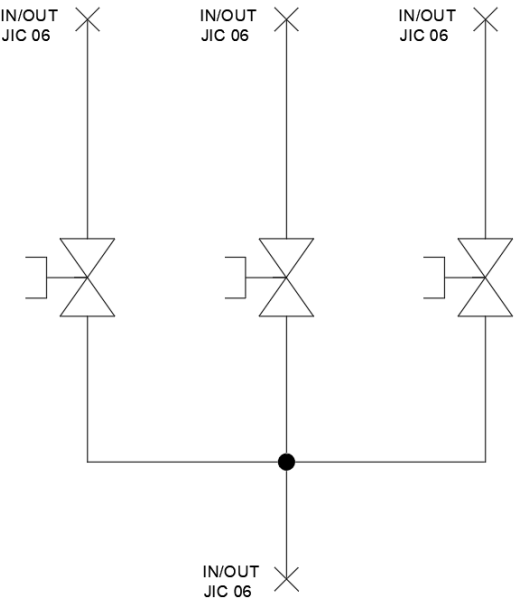

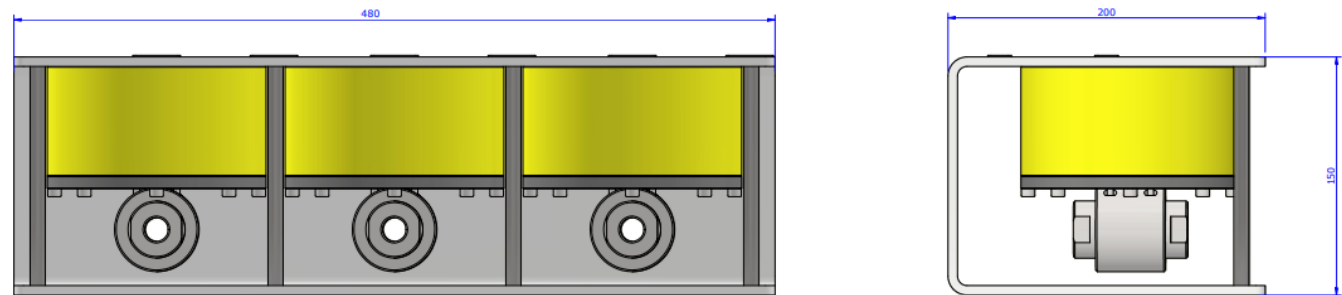

3x ROV Valve Panel

Document No.: EVT-14169

Revision: 0

General Technical Specifications

Type	3x ROV Valve Panel
Part Number	EVT-12036
Dimensions L x W x H	400 mm x 200 mm x 150 mm
Weight	10 kg
Depth Rating	3000 MSW

Q

■ The specification details are illustrative for marketing purpose only. Actual equipment may be different as a result of product improvement or other reasons. Specific interface and performance information should be reconfirmed at time of order placement. Envirent AS, Robotvegen 16, 4340 Bryne, +47 477 77 500, sales@envirent.no
